

Double-Duty Caregivers: How have they been affected by COVID-19?

Are you caring for a child or adult who is ill, disabled, frail, or elderly? Are you also working in health care?

Dr. Jasneet Parmar from the Department of Family Medicine at the University of Alberta & her team are inviting you to participate in a survey to understand how COVID-19 has affected double-duty caregivers. Double-duty caregivers health care providers who are also providing unpaid care work for a family member, chosen family, friend, or neighbor. It will take about 20 minutes of your time.

Click on the link to complete the survey
<https://redcap.link/doubleduty>

The objective of this survey is to understand how the COVID-19 pandemic and double-duty caregiving has impacted your caregiving and work experiences.

Family caregivers provide 75-90% of the care to children and adults living in community homes with serious illness, disability, or frailty.

About 70% of the Canadians providing care without pay to a family member, chosen family, friend, or neighbor are employed, many as healthcare providers.
